

Easy Homemade Slime:

Ingredients:

- ½ cup Glue (PVA, any brand)
- ½ cup Shaving cream (foaming)
- 3 ½ tsp. Activator* **

Directions:

- In a mixing bowl, stir together equal parts glue and shaving cream.
- Add activator 1 tsp at a time and stir until it starts to pull away from the sides of the bowl. Add more activator until it is workable and doesn't stick to the sides anymore.
- Once it forms a ball, pull it out and knead it in your hands (stretching and folding). It shouldn't stick to you at this point if it does add more activator.

Variations:

Get creative, use things like color glitter glue, put glitter into the slime, food color, or other add-ins to make it fun.

*as an alternative, you can use baking soda and contact solution

** activator:

This is the activator I used; it's a UK product [found here](#):

Alternately, in the US, Amazon Basics has a similar product you can [find here](#)
